Our Services

Remote Infrastructure Management

Our comprehensive range of remote infrastructure management services gives the customers the advantage to reduce cost of IT Infrastructure support and improve their efficiency of their service levels. As a result they enjoy a consistent, consolidated management and access to best quality talent on a daily basis.

ITSM Consulting

ITSM is a comprehensive framework for IT Service Management and is applicable to all organizations irrespective of the size or the technology in use.

Technology Consulting

In the current competitive times, where

Case Study

An online portal that offers Daily Deals and generates revenue for fundraising partners.

The Client's Story

The client helps their fundraising partners by giving them a platform that does not force them to sell items to their friends and family that they DO NOT want or need.

Client Challenges

With a strong focus on remarkable growth, the client wanted a portal that enables vendors to sell deals online, allocating portions of the purchase amount to fundraisers chosen by shoppers, the client, and the vendors. They also needed a donation option to directly support fundraisers. Team e intelligence deployed a website that allows registration for Vendors, Fundraising Partners, and shoppers with their unique purpose. We integrated functionality for Taxjar, where tax statements can be submitted, and vendors to sell their deals/products

The Results We Delivered

01

**Vender
Registration**

Developed a Website Registration that allows vendors and fundraising partners.

02

**Dashboard
Integrations**

Integrated vendor's dashboard to manage deals and view their orders and the total revenue.

03

**Profile
Management**

Integrated fundraising partner's dashboard to manage their profile and fundraising requirements.

04

**Shopper's Dashboard
Integrations**

Integrated shoppers' dashboard to select the fundraising partners they would like to contribute to.

05

**Admin Dashboard
Integrations**

Integrated admin dashboard to verify users and fundraisers, as well as manage payouts.

Technologies We Used
