The Client's Story

The client is into providing Sustainability Audits for Small and Medium Enterprises to help them prepare for the ever-changing market scenario, increasing competition, and transition to a low-carbon economy.

Client Challenges

The client wanted to develop software that generates a user-friendly questionnaire and delivers a sustainability audit report based on the results. e intelligence was able to deliver a sustainability audit quiz that generates free text responses, multiple choice answers, and mixed table responses through an intuitive questionnaire and produced reports in a well-formatted manner.

The Results We Delivered

01 Software Development for Q&A — Developed software with a questionnaire and its answers

02 Report Creation — Developed a functionality that generated precise sustainability audit reports based on the results

03 Payment Gatway Integrations — Integrated a payment gateway

04 Registrations & Subscription — Enabled Registration and Subscription functionalities for users

05 PDF Report Format Development — Enabled PDF format generation feature for the audit report

Technologies We Used

Laravel · jQuery · JavaScript · stripe · HTML5 · CSS · MySQL
